					\$120,000	\$125,333

- Based on stated date or on closest available date
 * IRR, or internal rate of return, determined w/ Excel IRR function, monthly compounding, and portfolio cashflow stream based on "initial buy" (or based on 10/30/2015 prices) and on "initial sell" (or on period-end prices); UN-AUDITED
 An IRR-based performance tabulation is meaningful/representative of reality as long as the invested capital isn't materially altered by non-repeating or one-time cash inflows and cash outflows.
 ** MSCI ACWI captures large and mid cap representation across 23 DM and 23 EM countries. With 2,476 constituents, the index covers approximately 85% of the global investable equity opportunity set. <https://www.msci.com/acwi>
 *** The S&P 500 Index is widely regarded as the best single gauge of large-cap U.S. equities. The index includes 500 leading companies and captures approximately 80% coverage of available market capitalization. <http://us.spindices.com/indices/equity/sp-500>
 **** The World Government Bond Index (WGBI) measures the performance of fixed-rate, local currency, investment grade sovereign bonds. The WGBI provides a broad benchmark for the global sovereign fixed income market. https://www.yieldbook.com/x/fxFactSheet/factsheet_monthly_wgbi.pdf
 ***** The raw data for Treasury bond and bill returns is obtained from the Federal Reserve database in St. Louis (FRED)

PLEASE NOTE: the IRR-based performance comparisons below are theoretical and pre-commission. Moreover, they are un-audited. The DK Analytics model portfolio is not intended to offer adequate diversification nor can it be construed to be investment advice. Readers are strongly encouraged to seek registered investment advisors for encompassing and continuing portfolio advice/portfolio management that is tailored to unique individual investor needs, profiles, and risk tolerances while providing for requisite diversification. Past performance is not a guarantee of future results. Nothing in this model performance worksheet should be understood to be a solicitation to buy or sell securities. Information provided has been prepared from sources deemed to be reliable, but they are not guaranteed. Liquid securities can fall in value. Capital losses associated with the DK Analytics model portfolio positions may occur. Given the relatively low model portfolio diversification, model portfolio results will fluctuate significantly in both absolute and relative-to-indices terms.
